

# **EVALUATION OF FISH WASTE COMPOST AS A FERTILIZER**

Nongmaithem Leindah Devi et al.,

## **ABSTRACT**

The study was conducted to evaluate the compost prepared from fish waste which was used as a fertilizer for agricultural use. A pot experiment was conducted to study the effectiveness of this compost on broccoli. Results from these experiments shows that this fish waste compost were highly effective to the broccoli and concluded that fish compost can be used as fertilizer in agricultural practices.
